

# Delta Series Pumps

*ultra quiet operation*

*super rapid priming*

*“quick release” lock ring*

**AQUA**  **QUIP**

## ultra quiet performance

Delta BM series

The Delta Series Pool & Spa Pumps have been engineered to deliver ultra performance for both medium and high head installations. Rigorous research and testing resulted in the development of the unique "double chamber" pump housing. This provides rapid priming ability and extraordinarily silent operation, far exceeding the requirements of pool builders, service professionals and consumers. Lid and basket removal is made easy with the distinctive "cam and ramp" lock ring feature.

- Ultra quiet operation
- Super rapid priming
- Unique "quick release" lock ring
- Huge Hair & Lint Pot

### Delta Pump Specifications
