

Spectrum Series Pool Lights

Colour Changing LEDs & Flush Mounted

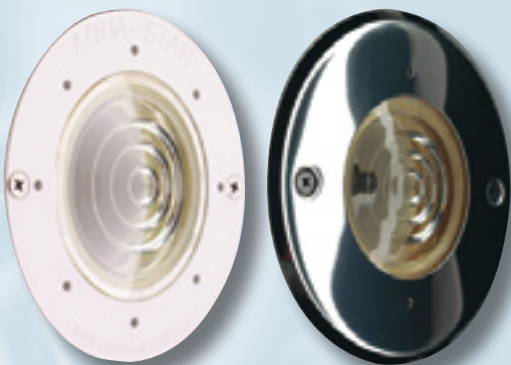

LED technology

simple to install

suits all pools & spas

AQUA  **QUIP** 

amazing colour effects

standard & optional stainless steel trim ring

Spectrum Series LED Pool Lights combine all the modern, compact and unobtrusive features of the proven Aqua-Star system with LED colour changing technology to add that WOW factor to your pool.

The lights are stylish and modern, making them ideal for all types of water features, spas, fountains, water falls, beach areas, ponds and catch tanks.

- Pool lights change colour at the flick of a switch, using the latest in LED colour changing technology.
- A variety of colour options and effects for mood lighting of swimming pools, spas and any water features.
- Low heat emission ensures 50,000 hour lamp life. Spectrum lights can operate above water level.
- Select a colour or allow multiple lights to flash or scroll through the colours of the spectrum.
- Optional stainless steel trim rings add elegance
- Simple to install, using the standard Aqua-Star housing and adjustable dress ring.
- Suitable for concrete, vinyl, fibreglass and modular vinyl pools & spas.
- Extra low voltage and made to relevant Australian Standards & Regulations.

no extra wiring or control boxes required.
