

RX series pool and spa sand filters

The sophistication of modern pools and spas is placing ever greater pressures on pumps and filters. That's why Hurlcon engineers put so much effort into matching the performance of the RX Series sand filters to the higher output of the latest Hurlcon pool and spa pumps. Together, they easily cope with the highest head pressures and flow rates. So Hurlcon RX Series pool filters can guarantee to provide perfectly clean, clear healthy water for your pool or spa.

Hurlcon RX series pool and spa sand filters

Hurlcon RX Filters produce crystal clear water using fine sand or zeolite as the filter medium. Zeolite is incredibly fine and the water clarity it creates is outstanding.

Efficiency.

Large capacity and higher flow rates enable the pool water to be filtered more effectively in a shorter period of time, saving on operating costs. They also make the RX Series perfect for in-floor cleaning systems.

Quality Components.

The 6 position multi-port valve ensures positive fitting and alignment of pipe work with no special tools required. Self-sealing barrel unions allow quick disconnection for inspection and changing the media.

Easy Cleaning.

Periodic cleaning can be achieved in less than 3 minutes by simply repositioning of the multi-port valve handle. The unique 12 arm hub with 25mm laterals provides excellent flow rates. Superior backwash ensures that the filter media is always cleaned efficiently and effectively.

Reliability.

Using seamless rotational moulding techniques exclusively developed by Hurlcon, each filter tank has unparalleled strength and stability. Made from environmentally friendly and recyclable High Density Poly Ethylene, even the filter's spherical shape has been carefully engineered to ensure maximum life and trouble free operation.

Genus Technology.

The RX Series is part of a family of high quality, highly intelligent, interconnected products that work together to take total care of your

pool and spa.

The Genus IV controller links all the separate components together through a single control that allows any member of the family to operate the system.

Specifications.

Model	Filter Area m ²	Nominal Sand kg	M3 Media kg	Flow Rate mm	Weight kg	Dim "A" mm	Dim "B" mm
RX 180	0.2	90	75	180	16	910	510
RX 280	0.3	125	105	280	22	1010	610
RX 320	0.4	175	135	320	29	1010	690
RX 360	0.4	175	135	360	30	1020	690
RX 400	0.43	200	165	400	34	1130	760
RX 500	0.64	300	225	500	44	1310	915

Range.

The Hurlcon RX Series Sand filters are available in 6 sizes complete with multi-port valve, pressure gauge, barrel unions and backwash sight glass.

Warranty.

Each filter is covered by a limited 10 year warranty on the tank and 12 month warranty on the valve and internals. For full details refer to the RX Series Instruction Sheet.

Every RX Sand Filter has a maximum operating pressure of 250 kpa, but is actually tested to 700 kpa.
