

## VX series salt chlorinator

Humans come from the sea and salt water makes up about 70% of our bodies so it's little wonder we find salt water the most natural medium to swim in. It's one reason why salt chlorinators are now the accepted standard for pool sanitising. But it's not the only reason. With the Hurlcon VX Salt Chlorinator you also get a new benchmark in control and convenience.

# Hurlcon VX Series Salt Chlorinator

To be accurate, salt doesn't sanitise the pool, chlorine does. Salt, in roughly the same solution as a tear Drop, is used to generate that chlorine as it passes through the clear cell and between two electrolytic plates. The salt reacts with the electrical current to form chlorine which then kills all contaminants within the pool. The result is pure, crystal clear water and happy, healthy swimmers.

## Control

Manual dosing with liquid or granular chlorine can be haphazard. Over-dosing can cause eye irritation, itchy skin and a strong chlorine odour.

VX Salt Chlorinators continuously generate the precise level of chlorine required. All you need do is top up the salt level occasionally.

## Genus Technology

The VX Series is part of a family of high quality, highly intelligent, interconnected products that together, take total care of your pool and spa.

The Genus IV controller links all the separate components together through a single control that allows any member of the family to operate the system.

## Convenience

From the Touch Pad, chlorine output can be adjusted and operating hours can be preset. So there can be one regime for weekdays and another for weekends, when the pool is more likely to be used. Even super chlorination can be managed from the controller.

## Pool and Spa combinations

Switching from the pool to the spa can be difficult. The pool's chlorine level is far too high for a spa so the salt chlorinator would simply stop,

or need to be turned off to stop it producing excessive chlorine. The VX and Genus controller work together to automatically turn down the VX output to the level required by the spa, and all with the push of a single button.

## Self-Cleaning

At intervals determined by the intelligent software program, the VX will reverse the polarity of its plates. This 'self-cleaning' process clears the plates of any build up, extending the cell's working life and virtually eliminating maintenance.

## Range

The Hurlcon VX Series Salt Chlorinators are available in 5 sizes with or without time clocks.

## Warranty

Each chlorinator is covered by an unconditional 5 year warranty on Cell & 3 year Pro Rata on Power Pack against defects in materials and workmanship. For full details refer to the VX Series Instruction Sheet.

Model	Time Clock	Chlorine Output Per hour	Pool Volume (Ltrs) (Temperate Climate*)	Pool Volume (Ltrs) (Tropical Climate**)
VX 6S	No	15 gms	60,000	35,000
VX 6T	Yes	15gms	60,000	35,000
VX 7S	No	22 gms	96,000	50,000
VX 7T	Yes	22 gms	96,000	50,000
VX 9S	No	30 gms	120,000	75,000
VX 9T	Yes	30 gms	120,000	75,000
VX 11S	No	42 gms	160,000	100,000
VX 11T	Yes	42 gms	160,000	100,000
VX 13S	No	50 gms	200,000	120,000
VX 13T	Yes	50 gms	200,000	120,000

\* Temperate Climate Water  
Temperatures are lower and therefore inhibit algae and bacteria

\*\* Tropical Climate Water  
Temperature are higher and require higher chlorine output to combat algae and bacterial growth.
