ZX series pool and spa cartridge filters

In some applications, a cartridge filter is the very best option. And in those situations, the unique Australian made and designed Hurlcon ZX Cartridge Filters are also the very best option. They don't require a back-washing line so they are often ideal for places or situations where waste water disposal is an issue. They are perfect for spas and suitable for all pools and first choice where Council or water restrictions apply.

Hurlcon ZX series pool and spa cartridge filters

Flexible Design.

The ZX is remarkably compact. The unique design allows for 3 output configurations, all with 1 inlet and up to 3 outlets. In all 3 configurations it provides exceptional performance in a very convenient package.

Quality Components.

The quality of any cartridge filter is primarily determined by the quality of its cartridge. The Hurlcon ZX Cartridge Filters use a state-of-the-

art Du Pont Reemay filter element.

One of the world's best filters, the Du Pont Reemay will provide years of super fine filtration.

Easy Cleaning.

The Du Pont Reemay filters the finest particles without embedding them in the element.

So it not only cleans the water more completely, it also cleans itself more thoroughly and more easily than other cartridges.

When it does need cleaning, the lid is simple to remove. The locking ring style is by far the quickest cartridge filter lid to lift off.

Convenience.

Manual air bleeding is no longer necessary. The ZX has a built-in automatic air bleed system. The 50mm water connections glue in for fast installation and the capacity to handle high flow rates

Reliability.

The lock ring lid provides a safe and sure method of sealing the lid positively even under the high pressures created by today's pumps. Every ZX will cope easily with high spa temperatures and while the maximum operating pressure is just 300 kpa, every ZX is actually tested to 700 kpa.

When sealed the automatic internal pressure release valve prevents damage to the pump and filter should the filter element ever become blocked.

Genus Technology.

The ZX Series is part of a family of high quality, highly intelligent, interconnected products that work together to take total care of your pool and spa. The Genus IV controller links all the separate components together through a single control that allows any member of the family to operate the system.

Range.

The Hurlcon ZX Series Pool and Spa Cartridge Filters are available in 6 sizes.

Warranty.

Each filter is covered by a limited 5 year warranty on the tank and 12 months on other components. For full details refer to the ZX Series Instruction Sheet.

Specifications.

| Model | Flow Rate lpm | Filter Area mm ² | Pump Size Watts (output) | Weight kg | Dim "A" mm | Dim "B" mm |
|--------|------------------|--------------------------------|-----------------------------|--------------|---------------|---------------|
| ZX 50 | 225 | 475 | 550-750 | 7.0 | 465 | 345 |
| ZX 75 | 290 | 700 | 550-1100 | 8.0 | 465 | 345 |
| ZX 100 | 375 | 940 | 750-1100 | 15.5 | 665 | 345 |
| ZX 150 | 445 | 1400 | 750-1500 | 16.5 | 665 | 345 |
| ZX 200 | 490 | 1900 | 750-1500 | 24.0 | 865 | 345 |
| ZX 250 | 515 | 2400 | 750-1500 | 25.0 | 865 | 345 |
