

# Waterco pool pumps

Aquamite, Supastream, Supatuf

## **Aquamite**

The Aquamite is an ideal pump for swimming pools and small recirculation systems including ponds and small water features.

## **Supastream**

Supastream pumps are general purpose units designed for use in swimming pools and low pressure water recirculation applications

## **Supatuf**

The Supatuf pump is ideal for large domestic swimming pools with ancillary systems such as heating, in-floor cleaning, fountains, vacuum cleaning and swim jets.

### Efficient Impeller and Diffuser Design

The pump's impeller and diffuser design maximizes the hydraulic output of the pump while minimizing turbulence. The pump's efficient hydraulic performance shortens run times and reduces energy consumption leading to lower operating costs.

### Engineered Durability

The pump body is manufactured utilising state of the art engineering plastic moulding with a single piece strainer pot and volute for extra strength.

### Waterco's Secondary Seal

Situated between the pump wet end & the pump motor, a mechanical seal forms a seal around the motor shaft to prevent water from running out along the shaft of a motor. The mechanical seal is the wearing part of any pool pump.

A mechanical seal may leak water if the pump is ever run dry or simply be worn out. If a leaky mechanical seal is not replaced promptly, water will travel up the shaft of the motor and ruin the motor in a very short period of time.

Waterco's Pump Secondary Seal protects the pump motor end shield from any water contact, by capturing any leaks through a worn out mechanical seal and draining it out of the pump.
