POOL CHLORINATION WITH SALT

www.watermaid.com

The WM10-QT300 Unit

HOW it WORKS

The Watermaid salt water chlorinator produces 100% available chlorine for your swimming pool after mild saline pool water is filtered and passes through the Watermaid cell.

INSTALLATION EXAMPLE
WM10-QT300

Chlorine is produced by the Watermaid chlorinator over several hours. It is dispersed evenly into the mild saline pool water which may provide relief for sensitive skin as well as asthma and hay fever sufferers.

Watermaid's proven chlorination system produces sodium hypochlorite which is a universally accepted agent for pool sanitation. With correct operation, your pool remains sparkling clean and clear, reducing maintenance, chemical costs and the need to store chemicals.

WM10-QT300 UNIT FEATURES

Suitable for pools up to 150,000 Litres (in temperate climates)

- ✓ **WM10 Power Supply**
- ✓ Heavy Duty Case
- ✓ Self Cleaning Features
- ✓ Overload Protection
- ✓ Easy to Read Display
- ✓ Adjustable Chlorine Output
- ✓ Low Salt Indication
- ✓ Optional Time-Clock
- ✓ Pump Socket Outlet

WM10 Power Supply

Water Chemistry Recommendations

- * Free Chlorine Level: 1 - 3 ppm
- * Filtered Water
- * pH: 7.2 - 7.8
- * Total Alkalinity: 80 - 140 ppm
- * Calcium Hardness Level: < 200 ppm
- * Cyanuric Acid Level: 50 ppm
- * 1 HP or Greater Pump.
- * 25kg / Year of Epsom Salts (Magnesium Sulphate) to be added to the water.
- * Maximum Salt Level 6000 ppm

Approval No. N13477 to AS/NZS 3100 & 3136

N1477C

QT300 Cell

- ✓ **QT300 Cell**
- ✓ Large Electrode Area
- ✓ Clear Cell Casing
- ✓ Proven Long Life Cell 5 - 8+ Years
- ✓ Full Flow or Venturi Flow Installation
- ✓ Easy to Install Cell

WM10-QT300 CHLORINE OUTPUT

- * Maximum Chlorinator Output per 10 Hours Running
- * 300 Grams of 100% Available Chlorine Equivalent to:
- * 460 Grams of Calcium Hypochlorite (65% available chlorine)
- * 2.4 Litres of Sodium Hypochlorite (12.5% available chlorine)
